EXPERIENCE

Intern

Microsoft   📅 04/2020 - 06/2020   📍 AGRA

Virtual Training cum Internship which actually paved a way for me to recognise myself as a Full Stack Developer. We have done a lot of things in those 3 months during the pandemic, and I can say that those are the most productive months for me till yet. Some insights of the work are-

- Implemented various Machine Learning Models like *Linear Regression*, Classification, KNN etc. using Python.
- Web Scraping of websites like Amazon, Flipkart etc using Python like *Scrapy* and *Beautiful Soup*.
- *Word Cloud* Formation.
- Some digital image processing like *Optical Character Recognition* and *Image Compression*.
- Developed a complete website from scratch including front-end (*HTML, CSS, Bootstrap, JS*) and Back-end (*Flask*).

Full Stack Development Intern

NOGOZO   📅 07/2020 - 08/2020   📍 AGRA

A Digital Bazaar startup where I was given the role of Full stack development Intern.

- Developed various front-ends of the website using some web development tools like *HTML, CSS, JavaScript, Bootstrap & jQuery*.
- Developed a complete Full Stack Development Project using *Django*, which consists of Front-Page, Blog & Quiz of Website.

Web Developer Intern

PRIXLED   📅 09/2020 - 10/2020   📍 AGRA

In a time when almost all aspects of our life are transforming for the better, it's time to give the written word a new, wholesome meaning. A revolutionary blogging platform.

- I worked as the Head of Back-end Team.
- We created and deployed the coming soon page of the startup which consists of the *Newsletter*.
- Other functionalities of the website like writing a blog, saving it to the database, applying templates.
- We also implemented the Profile section, Trending Blog Home page etc.
- All the functionalities were implemented using *Django*.

PROJECTS

RECRUITIZE

📅 06/2020 - Ongoing   📍 AGRA

A Startup based Hiring Platform which will revolutionise the hiring process. A web application which consists of resume builder, resume uploader, resume scanner and many more things. Students can upload a resume and apply for a particular role whereas recruiters can get the scanned resumes for a role. User can Register and Login and use services offered.

- Technicalities used were - for front end *HTML, CSS, JavaScript, BootStrap* etc. and for Back-end *Python and Flask*.
- *Link* to Source code - https://gitlab.com/ManiBakshi/resume_builder_flask

PROFESSIONAL SUMMARY

A Fresher looking for opportunities in Web Development field. My goal is to become a expertise in both Front-end as well Back-end technologies and be the best Full Stack Developer. I am committed to continuous learning and growing with full enthusiasm and complete confidence.

📅 03/2014 - 03/2015

MY LIFE PHILOSOPHY

Winners are not those who never fail but those who never quit. Quitting, and feel guilty about it is underestimating the opportunity. You cannot get it the same as the first.

SIR APJ APBDUL KALAM

PROJECTS

Ristorante con Fusion

📅 12/2020 - Ongoing   📍 AGRA

A Restaurant website which consists of various menu items, their recipes and images.

- A *Single Page application*.
- Built from scratch using *ReactJS* and *BootStrap*.

Nogozo

📅 07/2020 - 08/2020   📍 Location

Full Stack Development Project build during the internship using *Django*.

- *Link - https://github.com/ManinderBakshi/Complete_Django_Nogozo*

Startup Website
